Objective

Data Science student with hands-on experience in Python development and building AI-powered web applications. Skilled at creating machine learning models and deploying them using Flask and Django to solve practical problems. A national-level hackathon finalist with a proven ability to build secure, real-time tools and work effectively in fast-paced technical teams.

Technical Skills

Languages: Python (Advanced), SQL, JavaScript, HTML, CSS, NoSQL (MongoDB)

Frameworks: Flask, Django, Streamlit, FastAPI, Bootstrap

Developer Tools: Git, Google Cloud Platform, VS Code, Docker, Power BI, Jupyter Notebook.

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, OpenCV.

Projects

- | | |
|--|----------|
| AI-Powered Code Review Assistant Flask, Python, Git API | May 2025 |
| <ul style="list-style-type: none">A web app that automatically checks code quality to help developers find and fix errors faster.Improved debugging speed by 25% through real-time detection of coding mistakes. | |
| Campus-Auth Biometrics, OTP, Push Notifications | Aug 2025 |
| <ul style="list-style-type: none">A smooth, password-free login system for students and faculty to make campus apps more secure.Designed the system to stop "password fatigue" and protect user accounts with biometric security. | |
| Green Computing Data Center Python, Random Forest, ML Pipeline | Dec 2025 |
| <ul style="list-style-type: none">A machine learning project that predicts and lowers energy use in university data centers.Used a Random Forest model to predict how much power servers need based on their workload. | |
| Live Emotional Feedback Tracker OpenCV, Neural Networks, JavaScript | Feb 2026 |
| <ul style="list-style-type: none">A high-speed system that uses a camera to detect facial expressions and track how people are feeling.Built a face-tracking tool using OpenCV that recognizes emotions in less than 100ms.Created a live dashboard to show engagement levels and emotional trends in real-time. | |

Workshops & Achievements

- | | |
|--|------------|
| Gitam Workshop College hackathon | Feb 2025 |
| <ul style="list-style-type: none"><i>Hands-on AI Implementation for Meteorology: Actively participated in an intensive two-day technical workshop at GITAM School of Technology, focusing on the application of Artificial Intelligence models to enhance the accuracy of weather forecasting systems.</i><i>Real-Time Data Monitoring & Analysis: Demonstrated technical dedication by performing 24/7 continuous monitoring of live weather data streams to validate model predictions against real-world atmospheric changes, ensuring high-fidelity data collection for AI training purposes.</i> | |
| DecodeX 2026 Selected for Round 2 | Feb 2026 |
| <ul style="list-style-type: none"><i>National Finalist: Selected as a national finalist among top teams after clearing a data analytics assessment and submitting a detailed 1,500-word business case analysis.</i><i>Analytical Problem Solving: Qualified for the final 24-hour on-campus round by using data-driven frameworks to provide strategic solutions for real-world business challenges.</i> | |
| Atoms Srijan Selected for Round 2 out of 120+ teams | March 2026 |
| <ul style="list-style-type: none"><i>Built a passwordless authentication app using React, Node.js, and MongoDB with multiple login methods (biometrics, Face ID, TOTP) that works on any device.</i><i>Implemented WebAuthn (FIDO2) security standard with custom face recognition and secure backend credential verification.</i><i>Developed a full-stack application with security features like rate limiting and JWT authentication, demonstrating end-to-end MERN stack expertise.</i> | |

CERTIFICATES

- [Data Science internship – Intraniz.](#)
- [Data Analytics Professional Certificate – Coursera.](#)
- [Python Developer – Elevate Labs.](#)
- [Machine Learning with Python – IBM.](#)
- [Ui/Ux Design – Coursera.](#)

Education

GITAM University	Hyderabad, TS
Bachelor of Computer Science Engineering with specialization in Data Science	2023 – 2027
